Application
Lantern house for lighthouses

The **PINTSCH BAMAG** lighthouse lantern type **LHL** is a lantern house designed for the usages on lighthouses. These lantern houses are available in 3 different sizes optional equipped with different lanterns with flashing or rotating lights i.e. **PINTSCH BAMAG** rotating beacon type DLL6-300 or series DSL.

The lantern house is exclusively manufactured of stainless steel material 1.4571 and consist of a bottom-part with a small door and ventilating elements, of the glass middle part with sloping alternatively straight glazing support as well as of the roof-part with ventilation. The glass panels are made of 9mm thick safety glass.

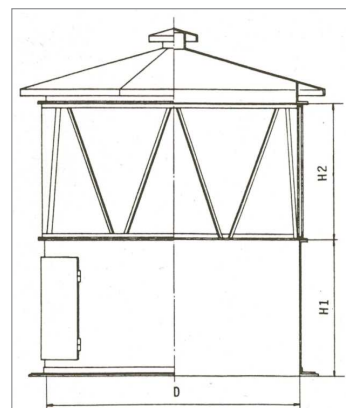

For the shipment the lantern house can be dismantled into several segments.
