

Order-Number  
008 417 XXX 612

**Application**  
Marking of fairways, marine  
obstructions, etc.

The **PINTSCH BAMAG** shallow water buoy type **SW240** is made from first quality steel. Floating body with ventilated central pocket, two lifting eyes and two mooring eyes are provided. Skirt keel is fitted with cast iron counterweights.

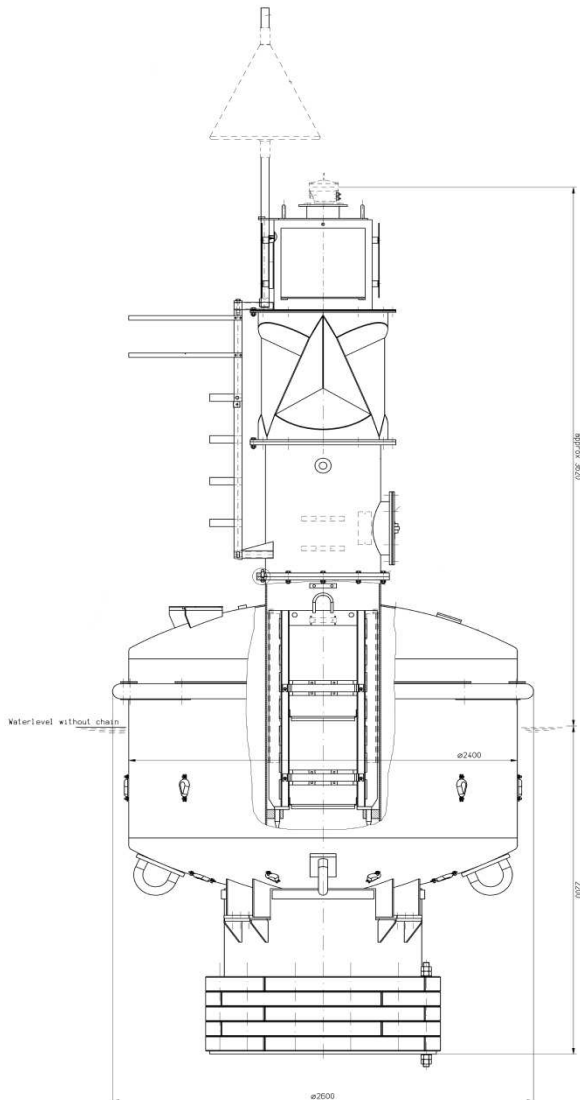

The superstructure with ladder, made from hot galvanized steel, carries the lantern, the radar reflector and the day mark, if required. Topmark and painting above the waterline are in accordance with IALA maritime buoyage system Region "A" alternatively Region "B". These buoys can be operated with solar powered batteries with an electric marine lantern type LEDmin, EE 155 or EE 250.

Additionally the buoy can be equipped with a GPS Synchronisation Module or the remote monitoring system type CoDeSy MKII.
